

maps.google.com

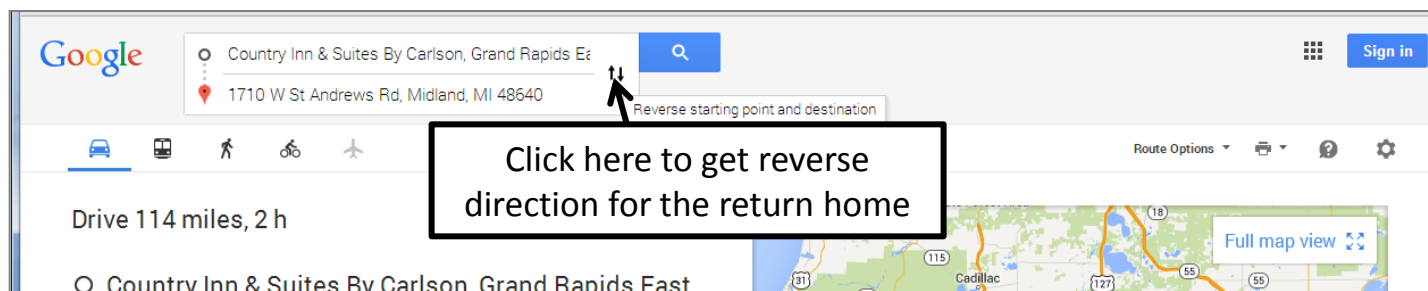

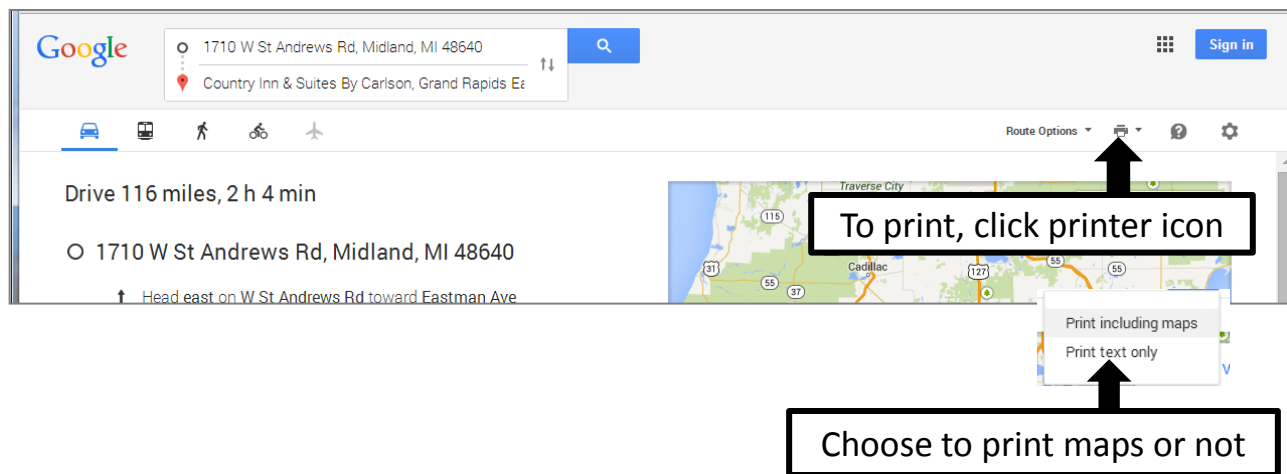

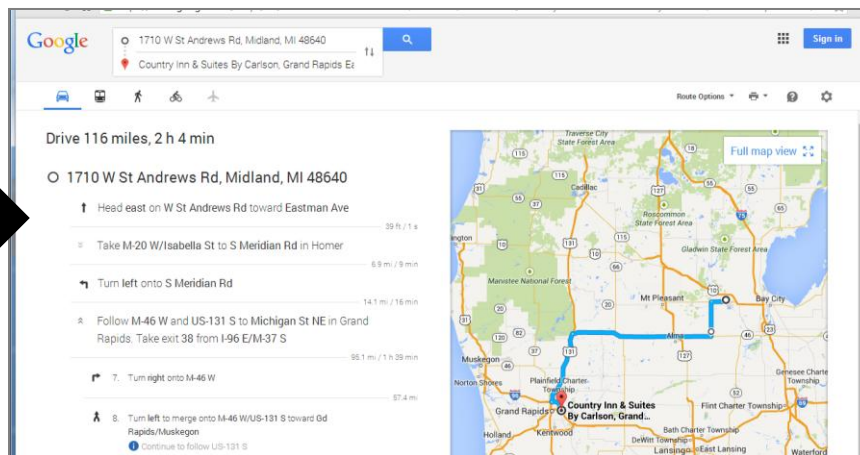

First task: find hotels near Meijer Gardens in Grand Rapids MI and print directions

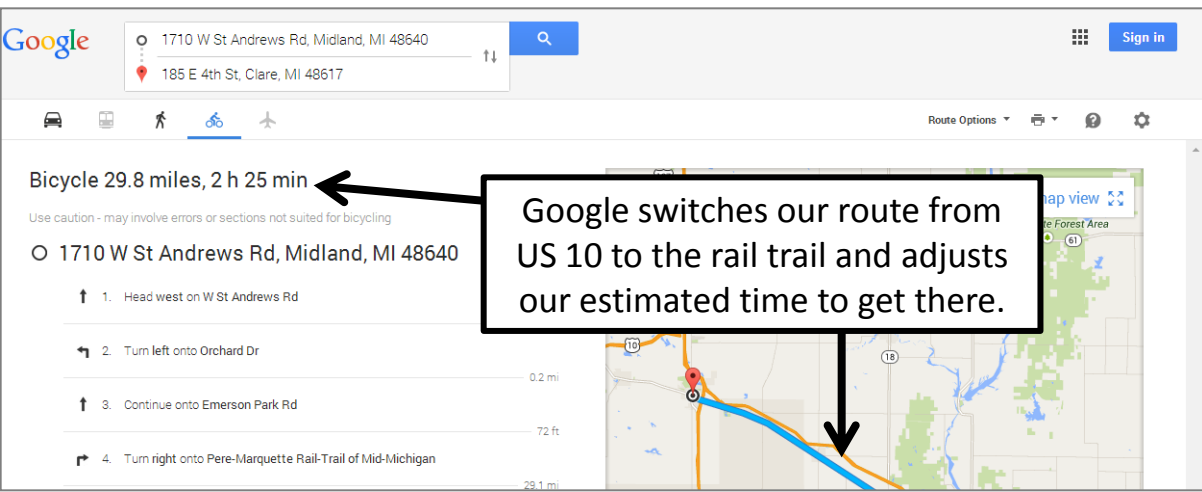

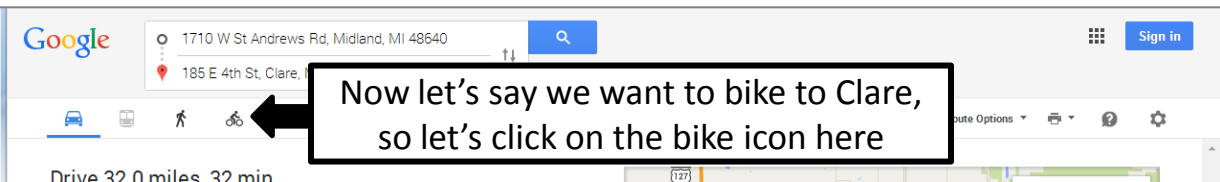

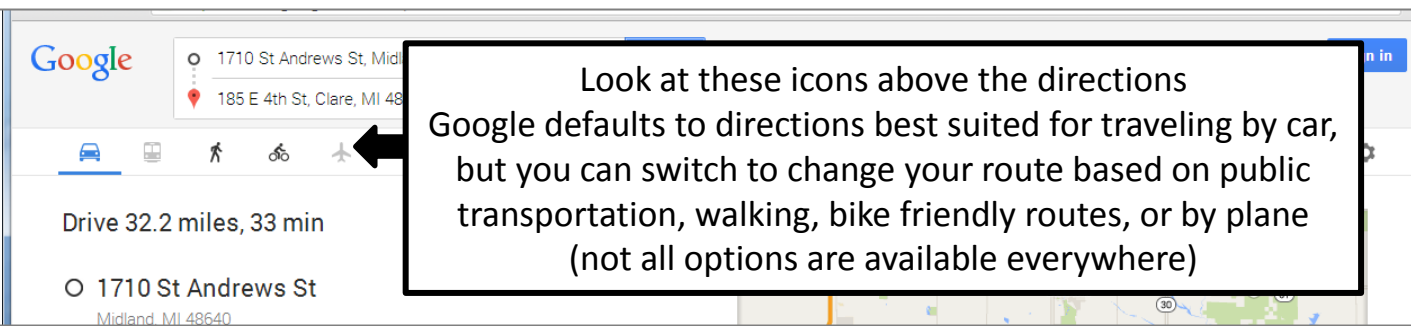

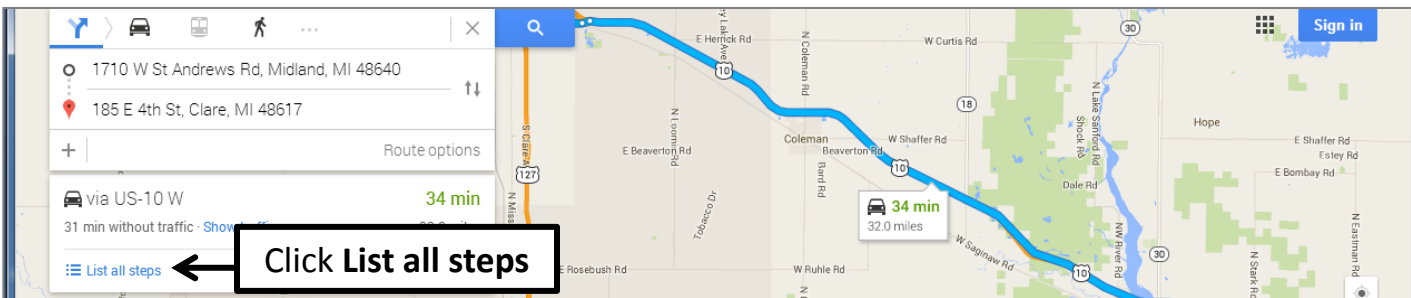

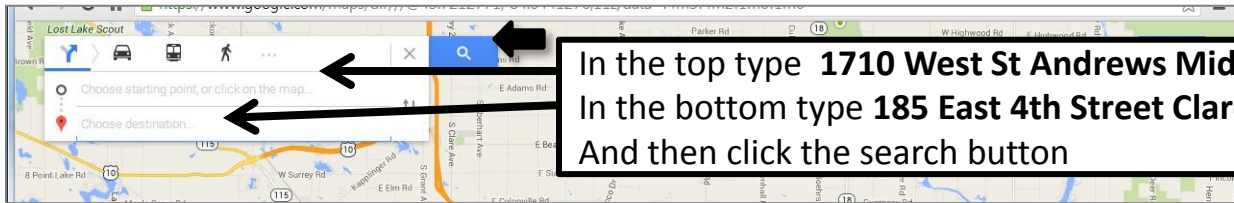

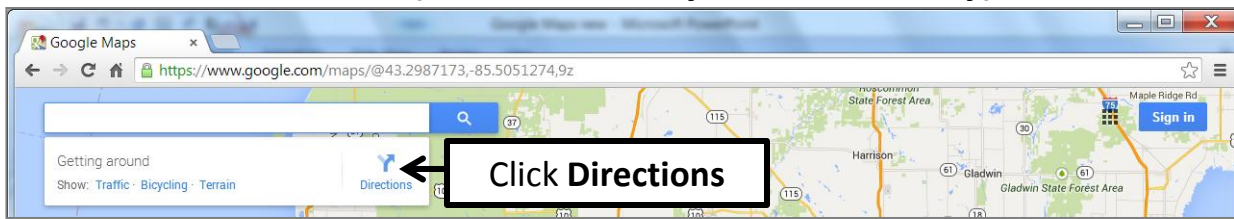

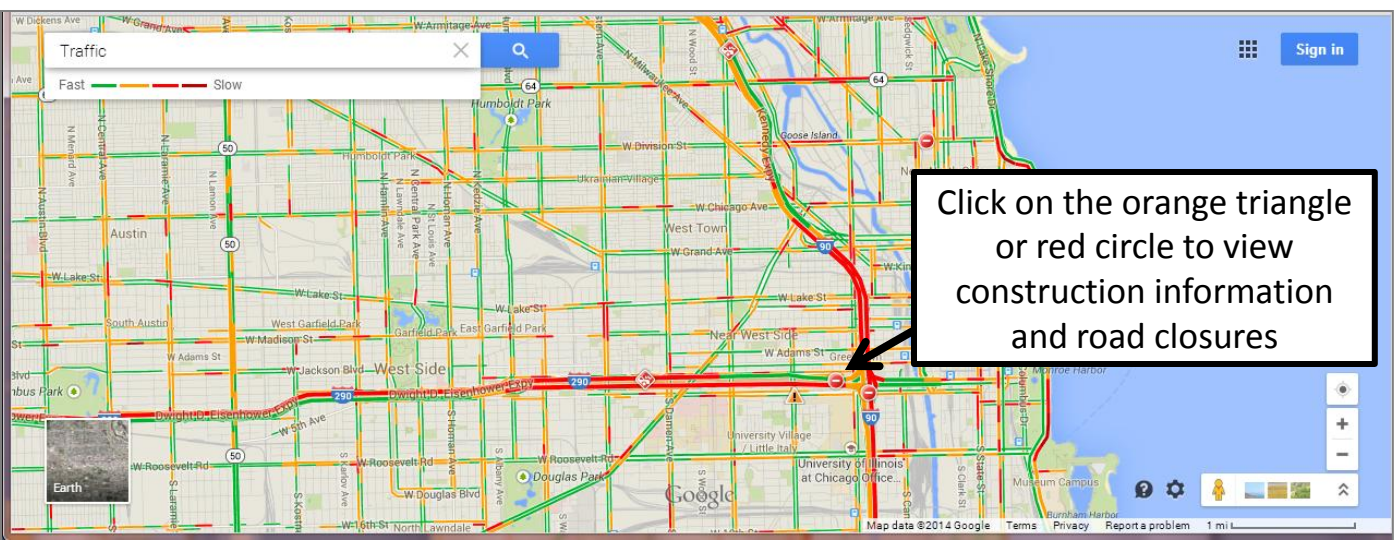

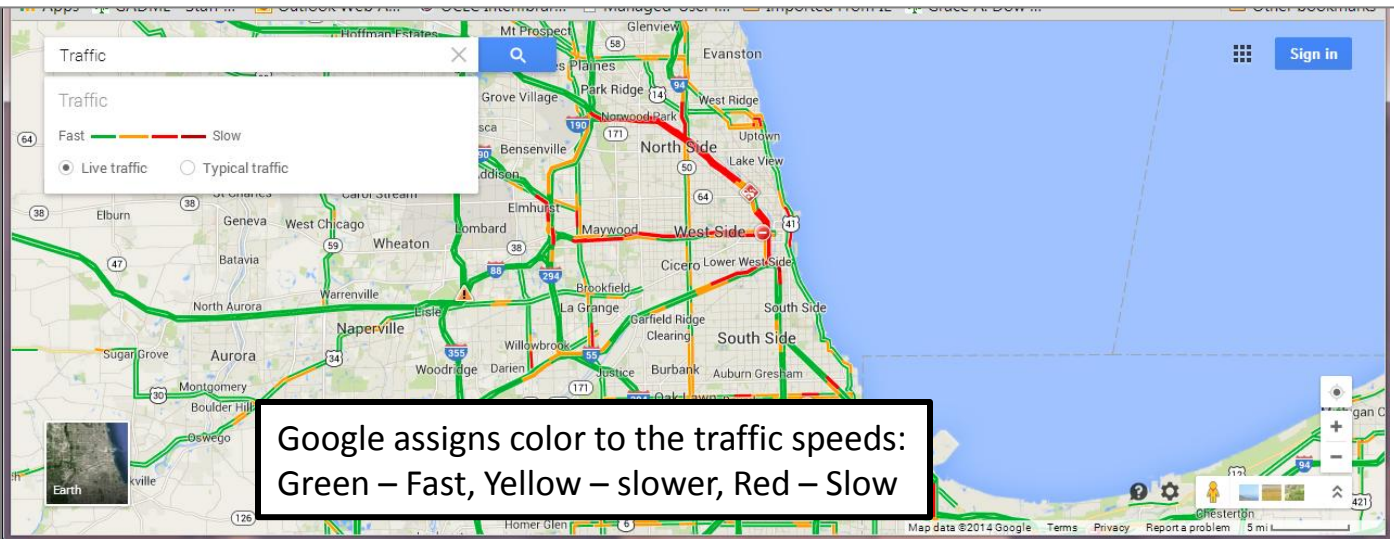

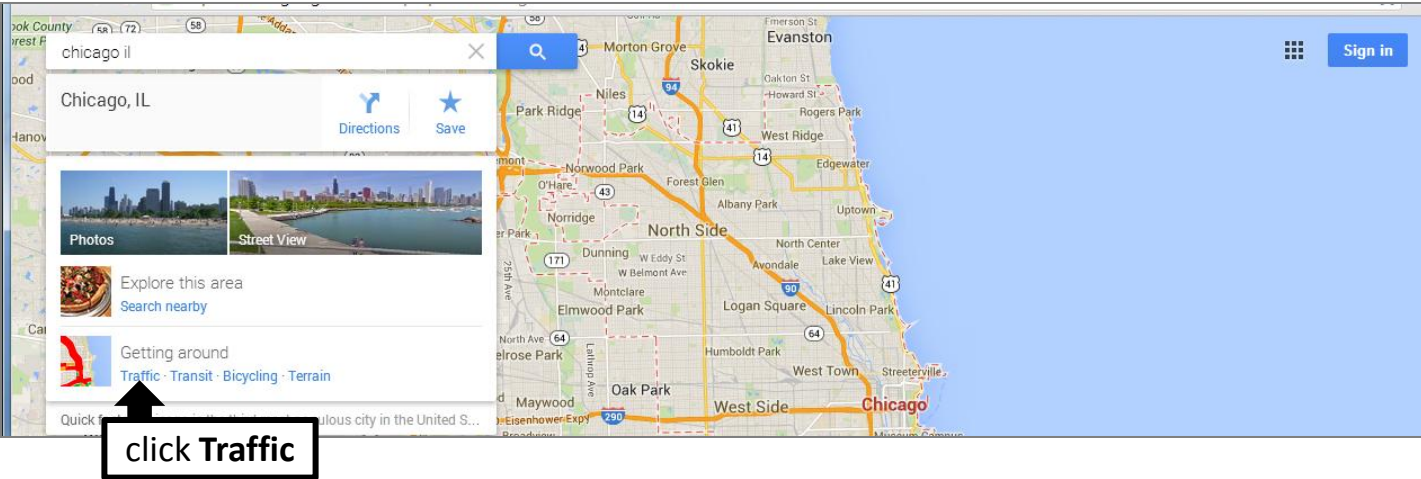

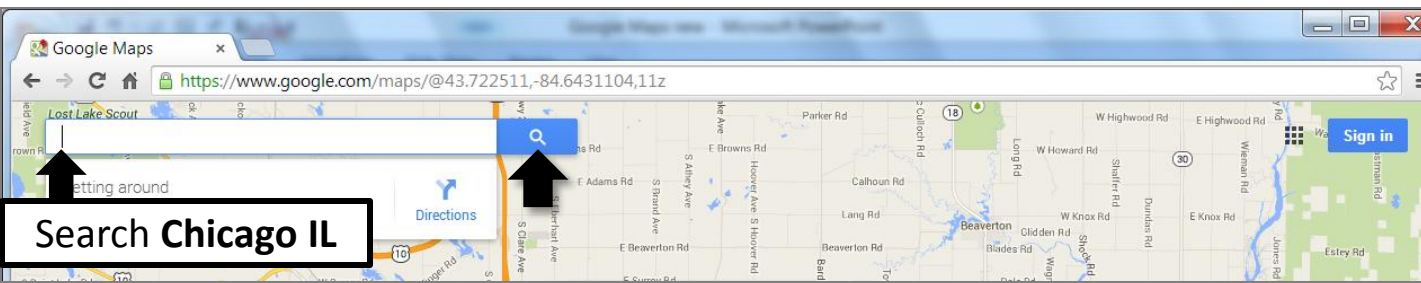

View step by step directions

Second Task: Find Directions using an Address (Midland Library to Clare Library)

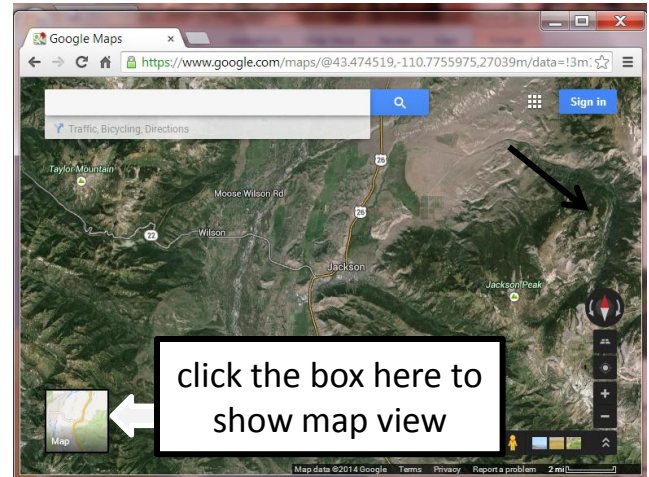

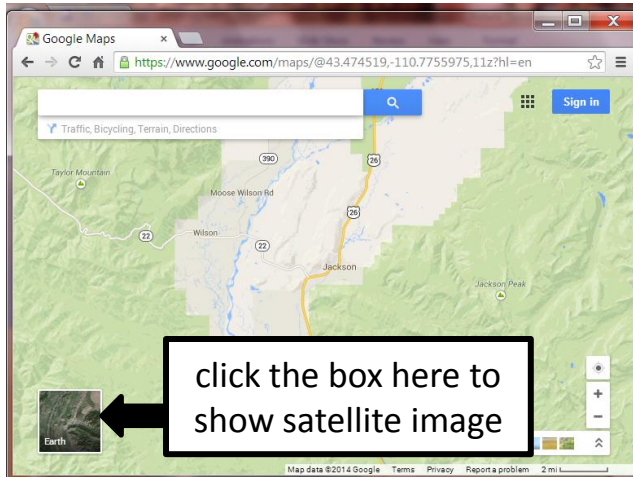

Third Task: Find traffic and construction information – example Chicago IL

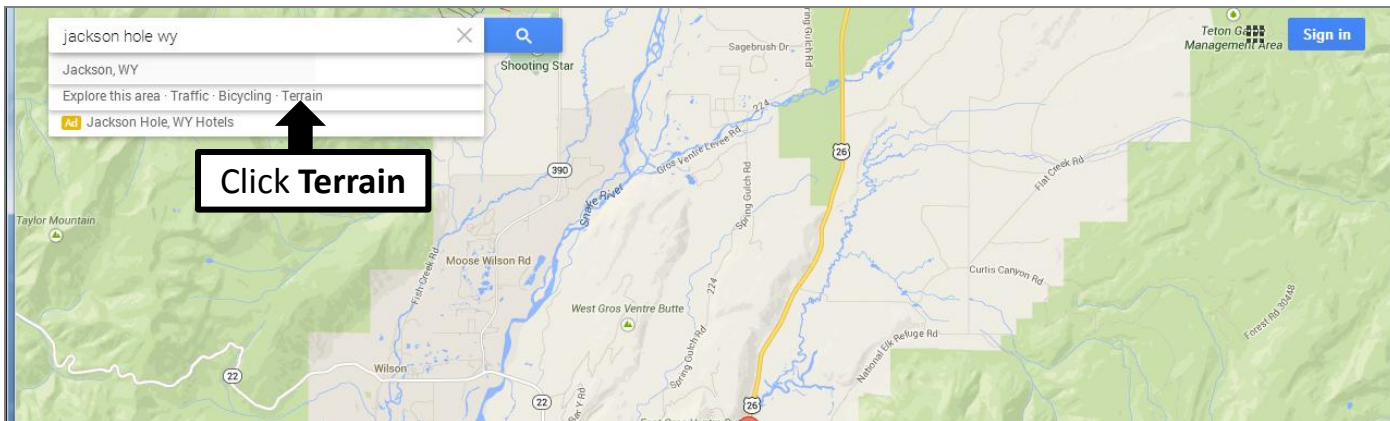

Explore using Google Maps - example Jackson Hole WY

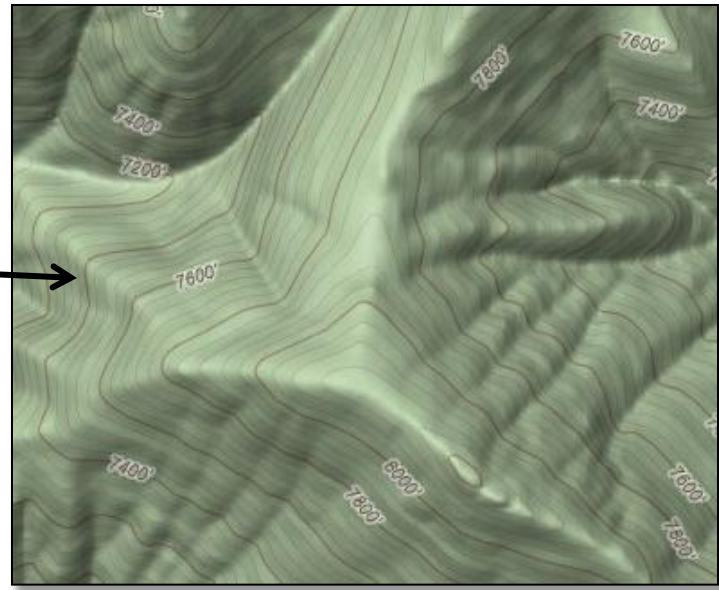

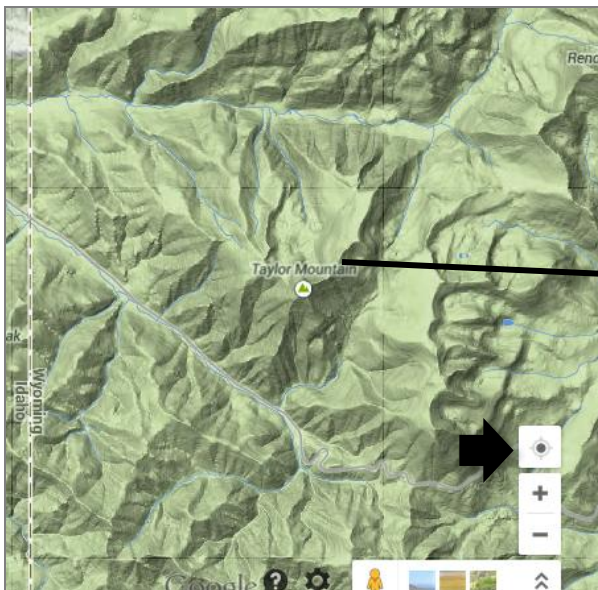

Map and Satellite View

Terrain view – Available in map view (not in satellite view)

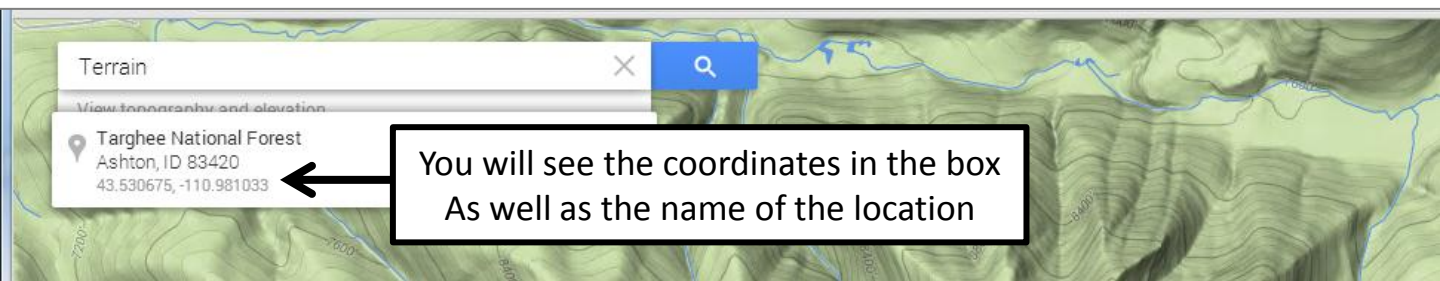

In Terrain view, if you zoom in far enough you can see elevation lines

Latitude and Longitude – Google maps can show you the coordinates for a particular place

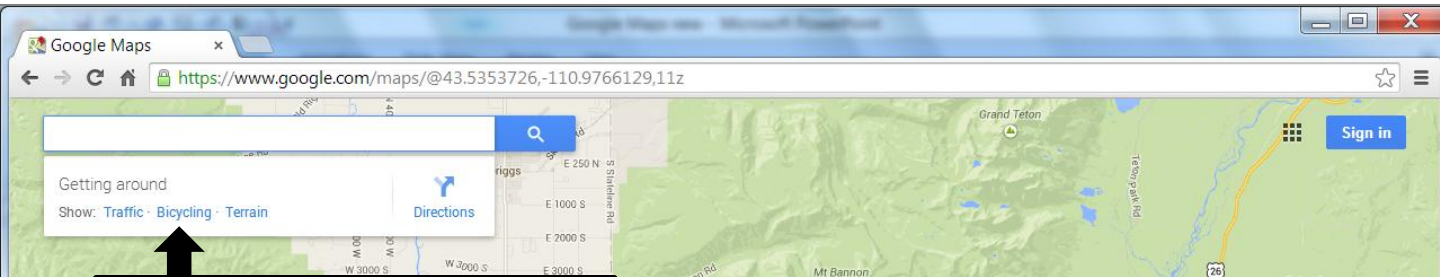

Right click over the spot and then click **What's here**

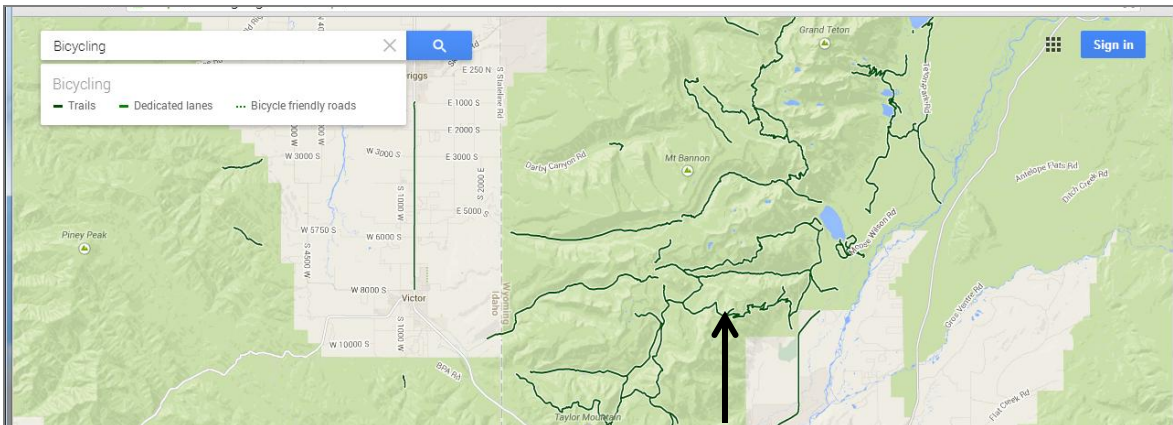

You will see the coordinates in the box
As well as the name of the location

Biking Paths

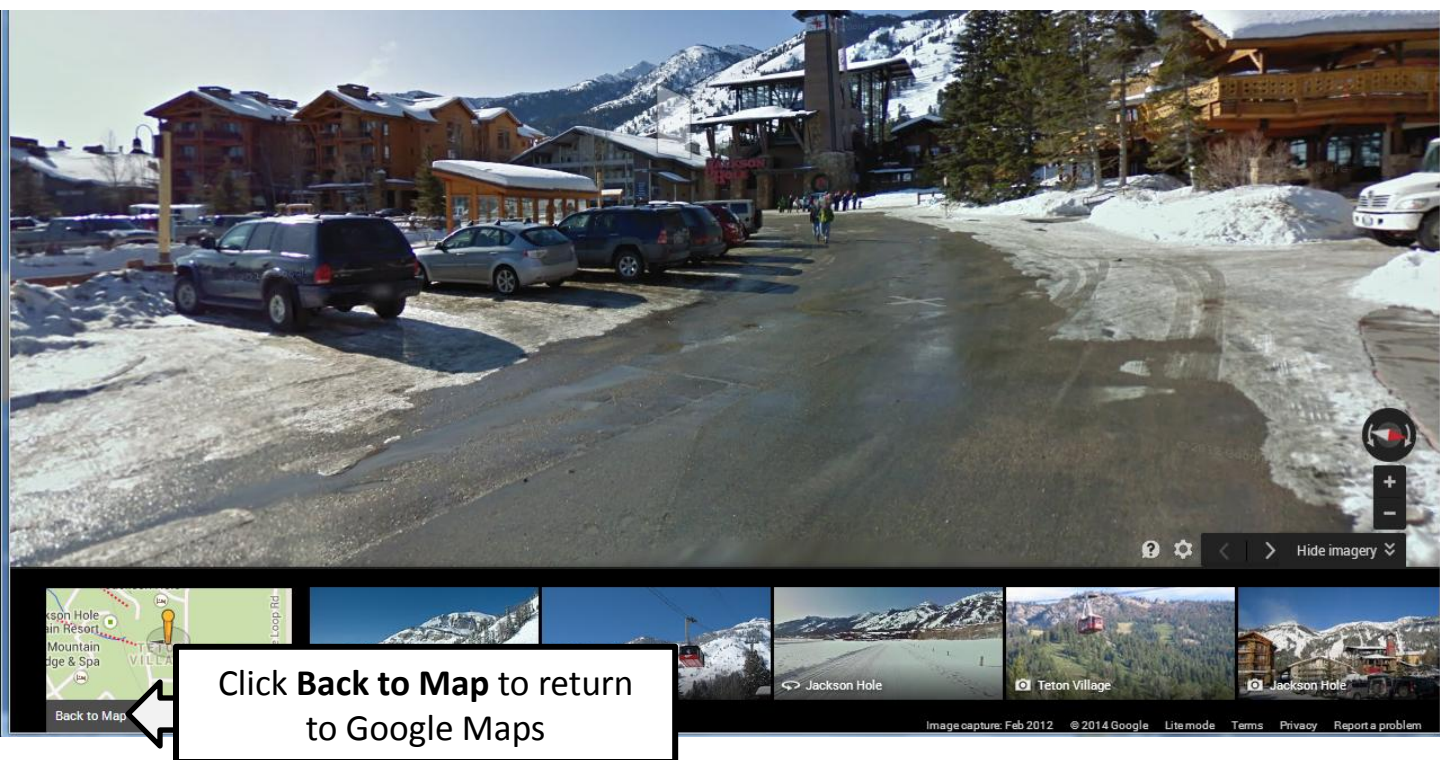

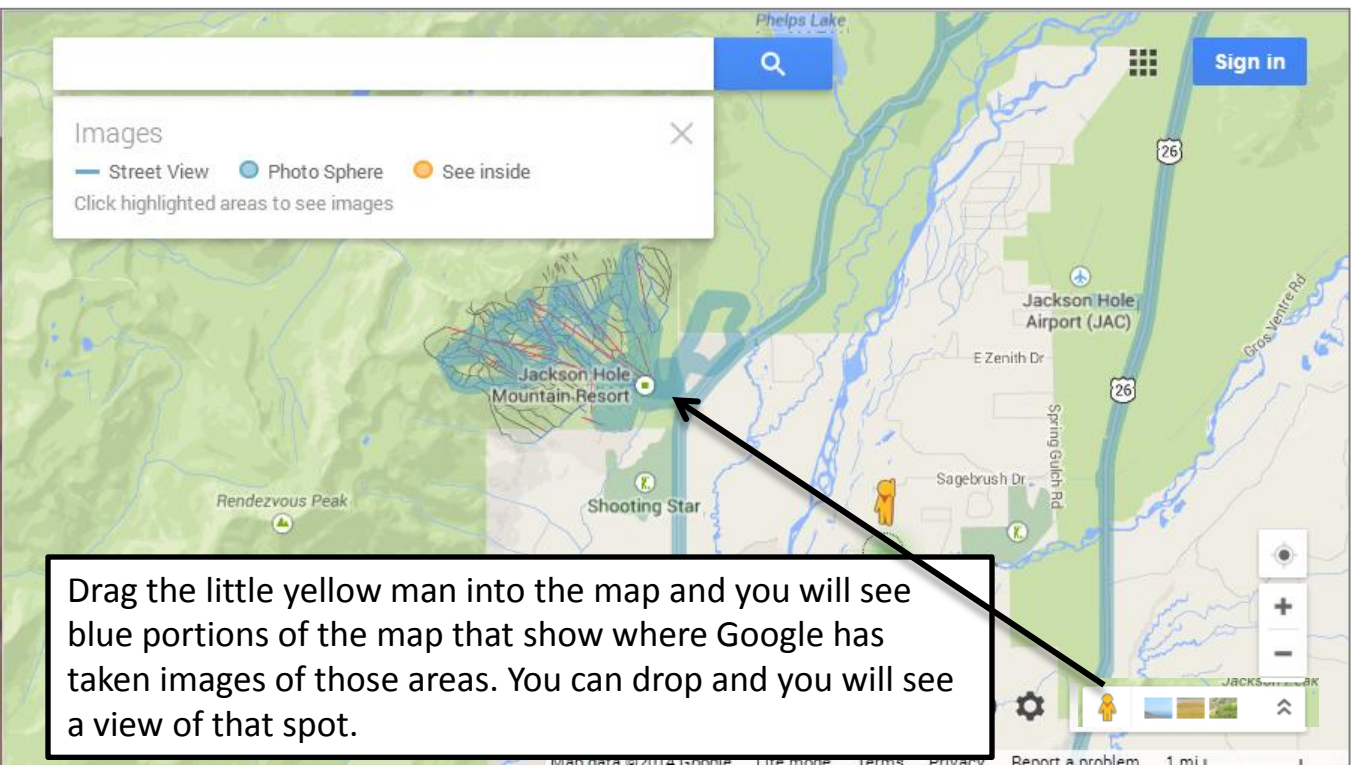

Choose **Bicycling** from the box

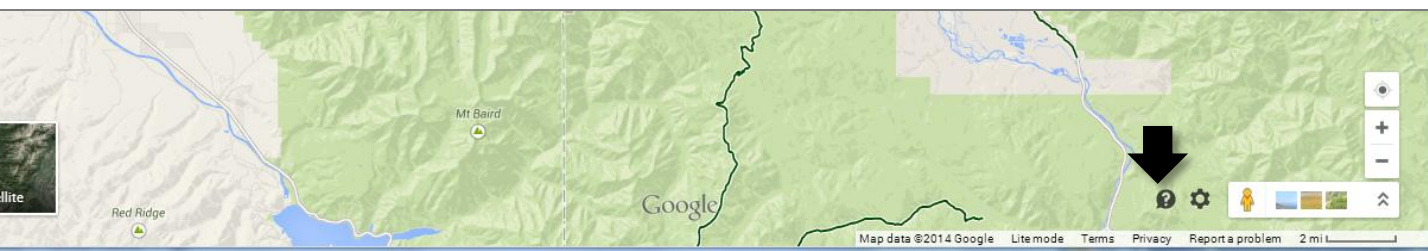

Bike paths show up in dark green on the map

Street View

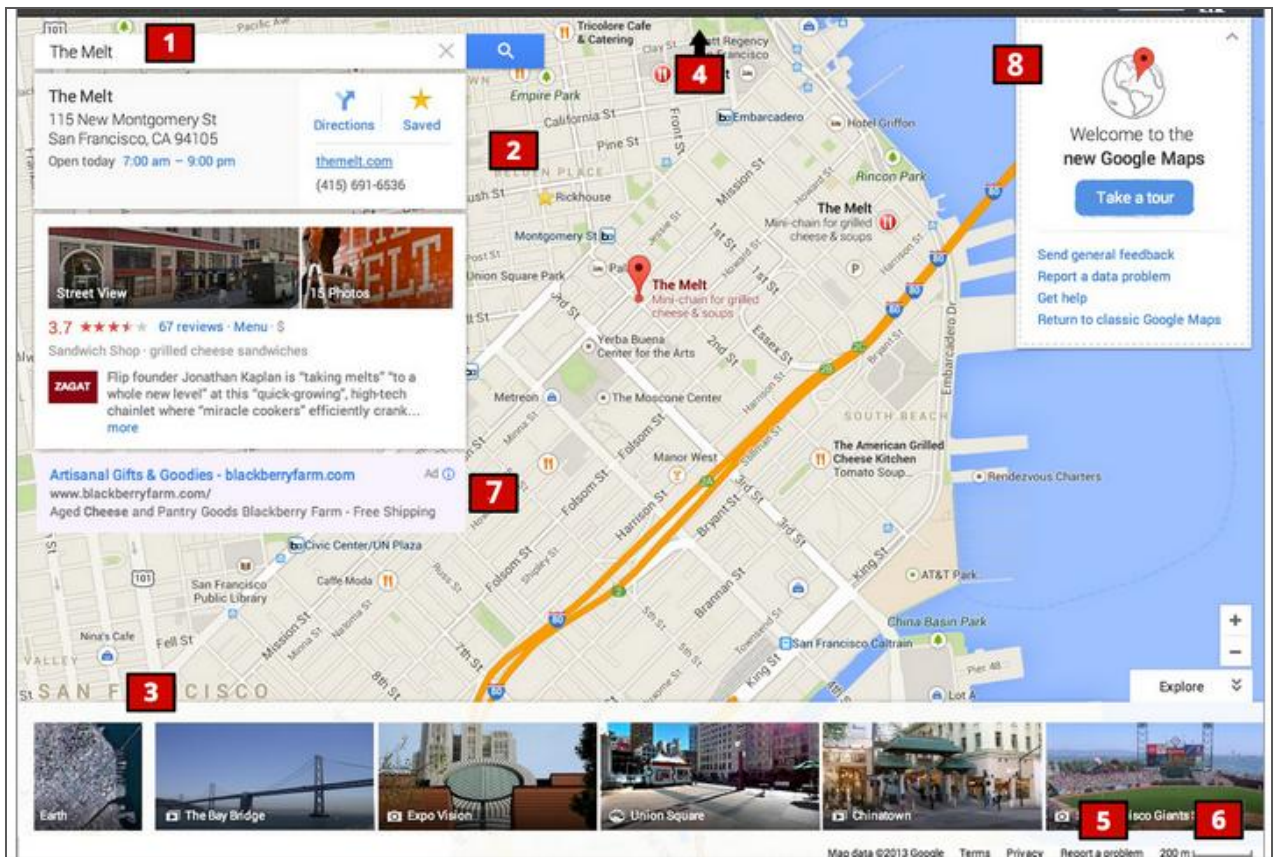

Help

Click on the question mark for more information about using Google Maps

Google Maps Overview

- 1. Search box** - Search for places, businesses, intersections, addresses and more on Google Maps. You can also click the search box to get directions, view recent search and web history, see transit and bicycle routes, and visualize traffic underneath the search box.
- 2. Search results** - Your search results appear on the map; the larger markers denote top results. Click any result to view more information, get directions, or even see inside a business. The details about that search result will appear below the search box.
- 3. Street View, photos, and photo tours** - Click any location on the map or search for an address. Imagery like Street View and photos will appear in the info card below the search box. See even more interesting imagery by clicking the button in the bottom right corner. Earth view can always be accessed from the bottom left corner.
- 4. Send a link** - The URL for your map can be shared at any time, including any selected places or directions. Just copy and paste the link to share with other people.
- 5. Report a problem** - Help to make Google Maps better by reporting data issues.
- 6. Distance measurement ruler** - Understand the scale of the map and distances between locations. Click the ruler once to toggle between miles (mi) and kilometers (km).
- 7. Ads** They are denoted by purple markers or appear as a purple infocard.
- 8. Help and Feedback**

Navigating the map

To pan (move the map), simply click and hold your mouse, then drag the map. Zoom in and out by using the mouse scroll wheel or you can also use the + and - buttons in the bottom right corner of the map. To center and zoom in on a location, double click the location.
